Quick Guide

While the player is powered on, press direction buttons to access to its 10 different functions, including Music, Movie, Radio, Bluetooth, Photo, Record, E-book, Step, Folder, Setting press  button to enter.

Plug your earphone into the jack to enjoy the music and radio you like.

Note: The player will into sleep mode automatically without operation within 1 minute. Click the power button for to wake it up.

Basic Operations

1.Charge the Player

1. Plug the attached USB cable into the USB port of a computer to charge the player. When you start charging, it will show two options: “Charge & Transfer” and “Charge & Play”. An indicate on the top right will show the charging statue.
2. Use only the 5V/500mA charger for charging or it may lead to product failure.

2.Power On/Off

Hold the Power button 3 seconds on the right to turn on/off the player.

3.Date Transfer

Plug it into your computer and copy over media files with the attached USB cable as if it was a flash driver or use music management software such as Windows Media Player to transfer the files.(Not supported for iTune)

Note: if your computer cannot detect the MP3 Player, try to update your USB driver or use another cable.

If it still can't work for you. Ask RUIZU Customer Service for additional help. (See Cover)

4.Lock Screen

Click the power button to lock the screen. Repeat to unlock it.

5.Return

While on playing interface, press the button  to exit.

6.Volume Adjustment

On the music playing interface click the button Up/Down to turn up/down the volume

Note: There's a built-in speaker in RUIZU X16 MP3 Player, the speaker will turn on automatically when no earphones are plugged in.

7.Headphones and Speaker

RUIZU MP3 Player only support Headphones with impedance 16 Ω or 32 Ω . Built-in Speaker could be turn off, see "Settings".

Card folder: View files in SD card’s memory.

RUIZU MP3 player works with any brand SD card up to 128 GB. If SD card can’t be read, please make sure the card can be read by other device first. If you believe the card is fine, please contact us for further help.(See Cover)

2.Create your own Playlists

When you connect mp3 player to PC, you can create folders in the mp3 player or SD Card. These folders can be used a Playlists.

If you drop some musics in one folder, and then unplug and go to “Folder view” icon on MP3, you can only play and shuffle these musics in the folder.

3.Sorting as same as on PC

Audio Book lovers usually need to make sure all files in the order they want. Unfortunately MP3 or SD Card’s memory designed different from PC’s storage. Thus you need some trick to sort files as same as on PC.

Here’s the steps:

- 1, Prepare the audio files and sort them on PC.
- 2, Select all files, but do not copy (Important).
- 3, Move your mouse cursor to the first file, and copy.
- 4, Paste files to mp3.
- 5, Unplug mp3 and go to “Folder view”, all files will be sorted exactly as same as on PC.

MP3 and SD card’s memory will sort file by edit time, the first file be dropped in will be list as first edited file. If you change the file name or do some other modification, it’ll go the last of the list. This trick only

works on “Folder view” icon, not on “Music” icon.
Don’t forget add a bookmark when you use audio
book.

Setting

Press  button with "Settings" on main interface to access to its function. And then a related list will show as follows:

Support and Troubleshooting

Q: How to transfer music to the mp3 player?

A: Download music to your computer first, and then connect mp3 player with your computer thru charging cable. A new disk will pop on as flash driver, and drop all your musics to the disk.

You can create folders in the disk to sort your music.

Q: Why my computer can't detect mp3 player?

A: RUIZU Mp3 player can be paired for all computer system with latest USB driver. Please update your USB driver before plug in Mp3 player or try another charging cable. If you still can't connect RUIZU Mp3 Player to your computer, please contact RUIZU customer service team for additional help(See Cover).

Q: How can I continue audio play after turn the player off?

A: You can not continue your play after turn off the player. However, if the player is in sleep mode, you

can continue your play by wake it up. See “Basic Operations” about how to get into sleep mode.

Q: Why buttons on the player can't work?

A: Sometime customer will accidentally active lock screen function which prevent button been used. Please see”Lock Screen” to unlock the button. If it still won't work for you, please contact RUIZU Customer Service to claim your warranty. See Cove
