Folder

Press ▶ button with "Folder"on main interface to access to its function.

All the files and folders in the player will be listed. If the micro SD card is inserted, you can choose to go to "Local folder" or "Card folder".

Note: Create your own folders to sort your songs.

For Audio book lover:

Almost all mp3 players are based on flash driver, which have different format from PC's hardware disk. Different format causes different sorting algorithm for file name, which is a big trouble to customer who need audios, such as audio book, play in certain order.

To solve this issue, the easiest trick is to sort files by edit time. Here's the instruction about how to do that.

1, Prepare the audio files and sort them on PC.

2, Select all files and do not copy (Important).

3, Move your mouse cursor to the first file, then copy.

4, Paste files to mp3.

5, Unplug mp3 and go to "Folder" to find your audio files.

Your audio files should be in correct order, the first file be pasted is the first file be edited. And you can also create folders to help you sort your audio books.

Setting

Press ▶ button with "Setting" on main interface to access to its function. And then a related list will show as follows:
